# Ukraine's Current Status, Policy for Decarbonization and Reconstruction, National Strategy and Expectations for the JCM

# CLIMATE GOALS OF UKRAINE

**NDC:** Reduction of total greenhouse gas emissions of Ukraine (including temporarily occupied territories) by 65% by 2030 compared to 1990 emissions

**Achieving carbon neutrality** of Ukraine's fuel and energy sector by 2050

**Achieving climate neutrality** for the country as a whole no later than 2060

**Reduce methane emissions by 30% by 2030 from 2020 levels,** as per the Global Methane Pledge initiative

**Share of renewable energy generation** in total electricity production at 25% in 2030

**Eliminate the use of coal in power generation:** for state-owned power plants - by 2035, for private power plants - by 2040

## STRATEGY AND ACTION PLAN TO MEET THE NATIONALLY DETERMINED CONTRIBUTION AND ACHIEVE CLIMATE NEUTRALITY

CMU Order 'On Approval of the Strategy for Formation and Implementation of the State Policy in the Field of Climate Change for the Period up to 2035' and its Action Plan

## LAW OF UKRAINE 'ON THE BASIC PRINCIPLES OF STATE CLIMATE POLICY'

Draft Law of Ukraine 'On the Basic Principles of State Climate Policy' was adopted in the 1st reading and is being prepared for the final 2nd reading

## NATIONAL ENERGY AND CLIMATE PLAN FOR THE PERIOD UP TO 2030

Adopted in 2024 by the CMU Order 'On Approval of the National Energy and Climate Plan for the period up to 2030'

## EMISSIONS TRADING SYSTEM (ETS)

Draft CMU Order 'On Approval of the Strategy for Implementation of the Emissions Trading System in Ukraine for the Period up to 2033' and its Action Plan - discussion is underway

## LONG-TERM LOW-EMISSIONS DEVELOPMENT STRATEGY

modelling of all sectors of the economy has begun, and basic input data and preliminary assessments are being collected in the energy and industry sectors

# STRATEGY FOR THE FORMATION AND IMPLEMENTATION OF THE STATE CLIMATE POLICY FOR THE PERIOD UP TO 2035

## DEVELOPED TAKING INTO ACCOUNT:

- ⦿ Increased effects of global climate change and its negative consequences for a number of economic sectors and spheres of human activity
- ⦿ the objectives of the state climate policy in the programmes of comprehensive recovery and overcoming the consequences of the armed aggression of the Russian Federation
- ⦿ implementation of the recommendations of the European Commission, as part of EU integration process

## Strategic objectives and indicators of their achievement

**Objective 1:** Strengthening the legal and organisational framework of the state climate policy

**Objective 2:** Mitigate climate change and ensure a socially just and economically efficient transition to low-carbon development of the state

**Objective 3:** Adaptation to climate change, building resilience and reducing climate change risks

## Stages of achieving goals:

**Stage I**

2024 – 2025 –2026

**Stage II**

2027 –2028 –2029

**Stage III**

2030 – 2031 –2032

**Stage IV**

2033 –2034 –2035

# LAW OF UKRAINE 'ON THE BASIC PRINCIPLES OF STATE CLIMATE POLICY'

## PROVIDES FOR

- creation of a climate governance architecture
- EU integration: Implementation of the main provisions of EU Regulation 2021/1119 establishing a framework for achieving climate neutrality and main provisions of EU Regulation 2018/1999 on the governance of the Energy Union and the mitigation of climate change
- setting the principles for the formation of climate policy
- setting a course for achieving climate neutrality
- mandatory consideration of the goals of the state climate policy in local and regional environmental protection programmes
- achieving the goals of the UNFCCC and the Paris Agreement
- establishing fiscal instruments for achieving climate goals
- creation and functioning of market mechanisms and instruments for implementing the state climate policy, including Article 6
- mandatory consideration of the goals of the state climate policy in comprehensive recovery programmes to overcome the consequences of the armed aggression of the Russian Federation against Ukraine

## PROMOTES

- ☑ consistent and systematic reduction of greenhouse gas emissions in all sectors of the economy and public policy areas;
- ☑ increase the absorption of greenhouse gases by sinks;
- ☑ ensuring a decent life and sustainable development;
- ☑ balance between environmental, economic and social aspects.

## Ukraine is a member of the

2022

### Implementing agreement with Switzerland

Work is underway to prepare a legal framework that will define the procedure for participation in cooperative approaches

2024

### Memorandum of cooperation with Japan

Work is underway to prepare a legal framework that will enable the work of Ukrainian representatives in the Joint Committee
